

PROTECTIVE FLOORING UNIT WITH FLAP

ABSTRACT OF THE DISCLOSURE

[0035] A protective flooring unit having a flap along an outer edge of the unit to enable separate flooring units to be joined by placing an overlapping portion of a second flooring unit on top of the flap of a first unit. The overall thickness or height of the flap is less than the maximum thickness of the main body of the unit such that there is not a significant rise or bump in the overlapping region.
